

SUMMARY

Versatile full-stack engineer with 4+ years experience delivering infra for 30k+ developers, comfortable managing stakeholders and scope in an ambiguous environment.

SKILLS

Languages Javascript (JS), Hack (PHP), Erlang, SQL, Python, Go (GoLang), C#, Java, C, Rust
Technologies React (React.js), GraphQL, Vue.js, Docker, Jupyter Notebook, Apache Thrift, Protobuf
Meta equivalent Prometheus, Grafana, Kafka, Kubernetes, AWS Lambda, MySQL, BigQuery

EXPERIENCE

Meta (WhatsApp)

London, UK

Software Engineer

May. 2022 - Current

- Scoped and delivered an approval management and access control system, partnering with legal and engineering stakeholders to automate work that previously consumed an entire team. Onboarded 4 engineers to continue the development, reduced time to access by over 90%, and enabled automated access provisioning and AI integration.
- Designed and implemented an offline code-analysis platform to inventory operational loggers across the codebase, creating a reliable source of truth for ownership, compliance and observability.
- Built static and dynamic analysis pipelines and CI integration that tracks logger use and configuration, fulfilling EU privacy directive regulatory requirements while preserving developer velocity.
- Aligned on and implemented deletion of legacy metric identifiers, saving \$40k+ per year while simplifying data-retention policy.
- Instrumented production services to trace data flows within and between systems, working with service owners to canary and roll out changes safely with feature flags.

Optiver

Amsterdam, NL

Software Engineer Intern

Jul. 2021 - Aug. 2021

- Owned requirements gathering, design, and implementation of a C# WPF GUI to navigate 2M+ data feeds.

University of Bristol

Bristol, UK

Teaching Assistant

Oct. 2020 - May. 2021

- Taught Imperative Programming (C), Mathematics for Computer Science A, and Algorithms I.

Commerzbank AG

London, UK

Software Engineering Intern

Jun. 2020 - Sep. 2020

- Owned and developed a CRUD frontend and a full-stack log monitor (React, Go, WebSockets) for live metrics.

Oxford Economics

Oxford, UK

Software Development Intern

Jul. 2018 - Aug. 2018

- Developed C# chatbot for requesting and viewing economic reports in chat.

EDUCATION

University of Bristol

Bristol, UK

BSc (Hons) Computer Science

2019 - 2022

- President of the University of Bristol Computer Science Society: 20+ events with up to 100+ attendees.
